# CAFFEINE ERA

## **Introduction-**

An Caffeine Era is a Mern stack project to be the best by offering a world class coffee to our lovely customers. The application provides provides very simple steps in which a customer cannot find any difficulty to order for himself. The Application designed in such a manner that one cannot be spelt without the other ,there are the hot coffee or cold coffee combinations with delectable desserts and special coffee and eats combinations for even a group of friends.

This project is user-friendly and requires minimum human intervention.

## **Objective-**

Our Main Objective is to build the best website by offering a world class coffee experience at affordable prices.

The offering is designed in such a manner that one cannot be spelt without the other, there are the hot coffee or cold coffee combinations with delectable desserts and special coffee and eats combinations for even a group of friends

## **Working Methodology-**

- The purpose is to reach world-wide by offering a world class coffee experience at affordable prices.
- As we know that Coffee has been around in India since the 17<sup>th</sup> century. And 80% of the population is like coffee. And for this we will provide a quick order facility for our customer.
- Here there are many Sub Sections where details about previous projects, experience and many more are provided to the user.

## **Software Specification**

- Technology Implemented : Front-End & Backend Technologies
- Language Used : CSS, ReactJS
- Development Environment : Visual Studio code
- Web Browser : Chrome / Firefox

## **Hardware Requirements**

- Processor : intel i3
- Operating System : Windows 7/8/10
- RAM : 4+GB
- Hard disk : 64 GB
- Hardware Devices : Computer System

### **Team contribution-**

- In this project we are working as a team of 4 people Astha, Prachi, Shruti and Yashi.
- There are different modules in this project handled by each person on choice based.
- Main (Home) Section and category section will be handled by Astha. And the Documentation and some sub parts are done by Prachi, Shruti and Yashi together.
- This will take probably one month to complete this project with full analysis.

### **Limitations of the System Proposed-**

- Internet connection is required while accessing the website.
- Easy searching algorithm is used in searching the movies so if data will increase system may slow down.
- As we are working in front-end & back-end technologies, we do provide functionality overview.
- It is simple website

### **Online GIT repository-**

## **Conclusion -**

The project **Caffeine Era** offers a world class coffee experience at affordable prices. The software take care of all the requirements of the process and is capable to provide easy and effective storage of information related to customers and resumes that come up to the system. It generates reports for customers & administrators. Provides easy designing tools and other interesting features. The system also provides the facility to contact the customer.
